Professional Summary

Full-Stack Software Engineer with hands-on experience building and deploying production web applications across professional and freelance work. Skilled in developing React.js and Next.js frontends, Node.js/Express REST APIs, and MySQL/PostgreSQL databases, with experience in authentication (JWT, OAuth 2.0, RBAC), payment and third-party integrations, and Linux VPS deployment. Has delivered full-stack features for multiple live client applications, including a UK-based cafe ordering platform, with end-to-end ownership from development through production deployment and debugging.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, SQL, Python (basic)

Frontend: React.js, Next.js, HTML5, CSS3, Bootstrap

Backend: Node.js, Express.js, REST APIs, CRUD APIs

Databases: MySQL, PostgreSQL, MongoDB (basic)

Authentication & Authorization: JWT, Google OAuth 2.0, RBAC, Bearer-Token Auth, Password Hashing

Integrations: Razorpay, Stripe, Cloudinary, Third-Party Logistics APIs

Deployment & Server: Ubuntu Linux, Nginx, PM2, Hostinger VPS, Environment Variables, Production Deployment & Debugging

Tools: Git, GitHub, Postman, VS Code

Professional Experience

Junior Software Engineer – Full Stack

Oct 2025 – Present

Akhilagna IT Services Pvt Ltd

- Deliver full-stack features across three deployed client applications – Vasavi Ayurveda (e-commerce), a Matrimony platform, and Vasavi Astrology – spanning React/Next.js frontends, Node.js/Express REST APIs, and SQL databases.
- Build secure authentication and authorization using JWT, Google OAuth 2.0, RBAC, protected API routes, and password hashing.
- Develop admin dashboards and CRUD functionality for managing products, member profiles, orders, and content across applications.
- Integrate Razorpay payments, third-party logistics APIs, and image upload handling for the live Vasavi Ayurveda e-commerce platform.
- Deploy and maintain applications on Ubuntu Linux VPS with Nginx and PM2; diagnose and resolve production issues – API 404s, database connectivity, and reverse-proxy configuration – using server logs and API testing.
- Collaborate within a three-developer team under a senior lead, using Git and GitHub for source control and deployment workflows.

Freelance Experience

Full-Stack Developer – Bagel Master (UK Client)

May 2025 – Jul 2025

Freelance | bagelmaster.co.uk – React.js, Node.js, Express.js, PostgreSQL, Stripe

- Delivered a live cafe and food-ordering application for a UK-based client as an independent freelance engagement, contributing across the customer-facing app, admin dashboard, and backend.
- Built the customer-facing ordering flow and admin dashboard, and integrated Stripe payment gateway and Cloudinary image handling.
- Developed frontend and backend functionality, connecting React and Node.js APIs to a PostgreSQL database and implementing order-management features.
- Owned UI/UX direction, including colour palette, visual styling, and preparation of image assets for the application.
- Migrated the PostgreSQL database from Neon to a Hostinger VPS using pg_dump and pg_restore, preserving tables, data, relationships, and constraints, and reconnected the backend to the migrated database.
- Coordinated with backend developers, assigning backend tasks where required, and handled cross-stack debugging through production deployment.

Education

Dr. Lankapalli Bullayya College of Engineering (Andhra University)

2025

B.Tech – Electronics and Communication Engineering

CGPA: 8.55

Additional Experience

Student Trainee – MERN Stack

2025

Dr. Reddy's Foundation

- Completed training in full-stack web development, REST APIs, CRUD operations, and application deployment.
